MAINTAINING STABLE RATES

Our not-for-profit cooperative business model helps us provide our members with safe, reliable and cost-effective electricity. In an increasingly volatile energy market, where the costs to purchase power, maintain our delivery system and distribute power are on the rise, Sam Houston EC will continue to do everything possible to maintain stable rates.

SAM HOUSTON EC IS DIFFERENT

Sam Houston EC is dedicated to increasing value to members by achieving and sustaining: a strong safety culture; consistent reliability improvement; service excellence; financial stewardship and a strategy for the future.

COOPERATION WORKS

To ensure we provide our members with competitive power costs, Sam Houston EC works with other co-ops in East Texas to purchase electricity from generation and transmission (G&T) cooperatives at a bulk rate.

DIVERSIFIED FUEL SOURCES

Our mix of electricity generation sources is distributed over a variety of natural resources. The electricity we deliver to our members is generated by coal, natural gas, wind, solar and hydropower. We're keeping an eye on the future as well, with renewable green projects. By diversifying our generation sources, we are able to ensure reliable, low-cost electricity for years to come.
